

The Price is Right | Aged Care Activity

Memorylanetherapy.com

Materials Needed:

1. Colored construction paper or origami paper
2. Scissors
3. Stapler

Step-by-Step Guide:

Step 1:

- Begin by cutting a short strip off one of the short sides of your paper. Set this strip aside – it will be used as the lantern's handle.
- After Cutting, Fold the paper in half lengthwise.

Step 2:

- Begin making evenly spaced incisions along the paper, starting from the folded side.
- Ensure each incision is about 2cm away from the paper's edge. Visual guidance is available in the provided image.

Step 3:

- Unfold the paper and lay it flat.
- Fold the paper in half once more, this time with the incisions on the outside.
- The two shorter sides of the paper should meet.

Step 4:

- Secure the folded sides by using staples. This forms the foundational shape of your lantern.
- Remember that strip of paper you set aside? Attach it to the top of the lantern using staples. This will serve as a practical and decorative handle for the lantern.
